# **7.2.1 BEST PRACTICES**

**BEST PRACTICE – I - Knowledge Building through Expert Interventions** 

## 1. Title of the Practice

Knowledge Building through Expert Interventions

In this digital era, epistemology building is an important component that provides for a holistic formation of a student, both internally and externally. The college enjoys the privilege of renowned experts from both within the country and abroad paying a visit to it. Having heard of the college's distinctiveness as a unit run by women, for women & of women', they get attracted to visiting the college. The college has created a platform for these visiting skilled minds to interact with the staff, researchers and students through formal and informal structures that enable learning on a sound basis.

In addition to this, the college motivates students and staff to participate in invited lectures, seminars and conferences conducted in other colleges at home and abroad. As our famous Tamil poet Bharathi sang "Sendriduveer ettuthikkum, kalaichelvangal yavum konarnthingu serpeer" (English Translation: Go in all the eight directions and bring home all the knowledge available in all the other parts of the world ) Hence, the institution has acknowledged "Knowledge Building through Expert Interventions", as one of its best practices.

## 2. Objectives of the Practice

- > Exposing students and scholars to lectures/speeches of subject experts
- > Emulating experts as modular role models
- Sarnishing knowledge through face-to-face interaction
- > Upgrading and updating knowledge through acquisition of latest information
- Providing a cross section of knowledge from Regional, National/ International perspectives
- Paving the way for more collaborative work, MOUs, Internships and Joint publications

#### 3. The Context

To transfer the contents of the program into the curriculum, a pack of knowledge building exercises, mainly through Seminars/ Conferences/ Invited Lectures/ Workshops, National and International has taken place periodically in the campus, where the students are provided with a plethora of opportunities to interact with and hold dialogues with the experts, as an extended and enriched platform to learn and re-learn.

As a holistic learning process, cultural exchanges, knowledge transfer, skill impartation, exposure to novel ideas and ideologies, and the like are enabled for the students and faculty making them live in within reach of a paradigm of everevolving frontiers of knowledge. An extended outcome of the learning process is the launch of many joint research projects, scores of collaborations on academic and extension phases, joint publications, and MoUs.

## 4. The Practice

Under this practice, the Departments are successfully organizing and conducting Regional/ National/ International Seminars, Conferences, Workshops, and Invited Lectures on various themes and topics from their respective disciplines, enhancing cross/ multi/interdisciplinary research culture. This practice has paved the way for signing MOUs and enabling academic exchange of staff and students and joint publications.

## 5. Evidence of Success:

- Engaged the scholars and students actively in keeping abreast of knowledge development.
- The faculty members have actively participated in programs in national level and international level
- Research collaborations, Joint publications, Academic Projects, Internships and industrial Linkages have been initiated

## 6. Problems Encountered and Resources Required.

Inadequate Travelling and daily allowances are given to resource persons. Other resources required also need a prop-up or up-scaling.
