# 6. NEW ISSUES

buring the late 1980s, a large number of developing countries changed their economic policies During the late 1700 and began the process of structural adjustments involving exchange rate and outward-looking liberalisation of their economies. In the process of structural adjustments involving exchange rate and outward-looking liberalisation of their economies. In the process of structural adjustments involving exchange rate and outward-looking liberalisation of their economies. to a market oriental and outward-looking liberalisation of their economies. In the early 1990s, socialistics of Eastern Europe and the Soviet Union had disintegrated alignments and Europe and the Soviet Union had disintegrated and adopted the marks countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the countries of Eastern Europe and the Countries of Eastern Europe and the Soviet Union had disintegrated and adopted the marks of the Countries of Eastern Europe and the Eastern Europe and East countries of Last.

It was against this background that UNCTAD VIII met at Cartagena in February and proceedings at UNCTAD VIII emphasised alobat. oriented retorned or proceedings at UNCTAD VIII emphasised global cooperation rather than confrary 1992. The proceedings at UNCTAD VIII emphasised global cooperation rather than confrary 1992 are determined for pregotiations and promotion of knowledges. ary 1992. The plant of the properties and promotion of knowledge-based policies. UNCTAD tation, the need for negotiations and promotion of knowledge-based policies. UNCTAD had five key areas on the agenda: resources for development, international trade, technol had live key and commodities. In order to evolve consensus on these issues, the conference deceptives, and commodities are their analysis and consensus on these issues, the conference deceptives. services, and should be on their analysis rather on negotiations. It was, therefore, agreed the UNCTAD should have a new structure on the lines of the OECD secretariat so that it devote itself to the analysis of issues which was set up in April 1992, as detailed above UNCTAD VIII focussed on new issues such as services and sustainable development and new organisational structure.

The UNCTAD IX held at Midrand (S.A.) in May 1996 urged its members to provide n sources for sustainable development and debt relief to developing countries and to carr issues relating to technology, services and commodities in the light of the WTO Agreem

of the GATT.

and are raised from time to time. But quotas can only be raised by a resolution of the majority of and are and are cent of the total voting power of the Fund's members. When the Fund started operation in March 1947, the total quotas were 7.6 billion dollars which had been increased to SDR 146 billion in April, 1994 with the Tenth General Review of Quotas. This increase was 50% of members quotas. With the Eleventh Review of Quotas effective March 1998, the quotas were raised by 45% to SDR 212 billion

Thus a member country's quota determines its subscription to the Fund, its relative voting power. allocation of SDRs and access to Fund's resources. A member's voting power is based on one vote for each SDR 100,000 of quota in addition to the basic votes of 250 for each member. When a country becomes the member of the Fund, it is allocated a quota which raises the total tesources of the IMF

#### 2. Fund Borrowings

Besides performing regulatory and consultative functions, the Fund is an important financial institution. The bulk of its financial resources comes from quota subscriptions of member countries. Besides, it increases its funds by selling gold to members. Further, it borrows from government, central banks or private institutions of industrialised countries, the Bank for International Settlements, and even from OPEC counties, like Saudi Arabia.

General Arrangements to Borrow (GAB): The Fund also borrows under the General Arrangements to Borrow from its eleven industrialised members in order to forestall or cope with an impairment of the international monetary system. The GAB remained in force from October 1962 to December 1998, when its total borrowings was SDR 17 billion. Under the New Arrangements to Borrow, the developed countries have sanctioned \$ 25 billion.

#### 3. FUND LENDING

The Fund has a variety of facilities for lending its resources to member countries. Lending by the Fund is linked to temporary assistance to members in financing disequilibrium in their balance of payments on current account. If a member has less currency with the Fund than its quota, the difference is called reserve tranche. It can draw up to 25 per cent on its reserve tranche automatically upon representation to the Fund for its balance needs. It is not charged any interest on such drawings, but is required to repay within a period of three to five years.

Credit Tranches. A member can draw further annually from balance quota in 4 instalments upto 100% of its quota from credit tranches. Drawings from credit tranches are conditional because the members have to satisfy the Fund of adopting a viable programme to ensure financial stability. To meet the severe BOP problems, the Fund has been gradually raising the limit of borrowings by its members over the years under the credit tranche. Now members can draw up to the equivalent of 300 per cent of their new quotas on the total net use of the Fund's resources. The limits exclude drawings under CCFF, BSAF, SAF, STF and ESAF. Purchases by members are made under stand-by arrangement rather than directly. Borrowings up to this limit are allowed

# THE INTERNATIONAL MONETARY FUND (IMF)

### 1. ORIGIN OF IMF

The International Monetary Fund (IMF), also called the Fund, is an international monetary in the Assessment of July 1944. The part The International Monetary Fund (IMF), also cause the French Woods Agreement of July 1944. The principal tution established by 44 nations under the Bretton Woods Agreement of July 1944. The principal tution established by 44 nations under the Bretton Woods Agreement of July 1944. The principal tution established by 44 nations under the Bretton Woods Agreement of July 1944. The principal tution established by 44 nations under the Bretton Woods Agreement of July 1944. The principal tution established by 44 nations under the Bretton Woods Agreement of July 1944. The principal tution established by 44 nations under the Bretton Woods Agreement of July 1944. tution established by 44 nations under the Bretton Woods 1930s. The attempts of many countries aim was to avoid the economic mistakes of the 1920s and 1930s. The attempts of many countries aim was to avoid the economic mistakes of the 1920s and to return to the old gold system after the First World War failed miserably. The World Depres sion of the thirties forced every country to abandon the gold standard. This led to the adoption of purely nationalistic policies whereby almost every country imposed trade restrictions, exchange controls and resorted to exchange depreciation in order to encourage its exports. This further, brought a marked decline in world trade and extension of depression. It was against this background that 44 nations assembled at the United Nations Monetary and Financial Confer. ence at Bretton Woods, New Hampshire (USA) from July 1 to July 22, 1944. Thus the IMF was established to promote economic and financial co-operation among its members in order to fa cilitate the expansion and balanced growth of world trade. It started functioning from March 1 1947. In June 1996, the Fund had 181 members.

### DBJECTIVES OF THE FUND

The fundamental purposes and objectives of the Fund had been laid down in Article 1 of the original Articles of Agreement and they have been upheld in the two amendments that were made in 1969 and 1978 to its basic Charter. They provide the framework within which the Fund functions. They are as under:

1. To promote international monetary co-operation through a permanent institution which provides the machinery for consumption and collaboration in international monetary problems.

To facilitate the expansion and balanced growth of international trade and to contribute thereby to the promotion and maintenance of high levels of employment and real income and to the development of the productive resources of all members as primary objectives of economic policy.

3. (To promote exchange stability, to maintain orderly exchange arrangements among mem-

bers, and to avoid competitive exchange depreciation.

ely of exchange controls and multiple exchange practices.

ety of extensions Politics. The Fund has been criticised for its discriminatory policies against 7. Discriping countries and in favour of the developed countries. It is, therefore, characterised are developed countries Club". Although the majority of its members are the developing countries of Asia. Africa and Latin America, yet it is dominated by the rich countries especially the United Asia. The latter often adopts a rigid attitude in matters concerning increasing the Fund resources and granting loans to developing countries

Responsible for Asian Crisis. The sudden and unexpected East-Asian crisis in Phillipines. South Korea, Thailand, Indonesia and Malaysia put a question mark on the working of the Fund. South As put the blame on the IMF for global crisis because it has been the result of government's intervention in the market, both internationally via loans, subsidies or taxes, and externally via the IMF. With the collapse of the Bretton-Woods system in 1971 when the member countries adopted the floating exchange rate policy, the Funds role of regulating the exchange rate ended. Prior to the 1995 Mexican crisis, the objective of the Fund was to provide advice, information and loans to its members. But when it helped Mexico in a bail out package in its crisis of 1995, it acted the international lender of last resort. Under it, the Fund laid emphasis on close financial relations among banks, corporations and governments and to increase the operations of stock and bond markets so that there is greater competition between domestic and global financial institutions. This very policy led to the Asian and global financial crisis when there was successive decline in shares, bonds and currencies of these countries. The real beneficiaries of this policy were not the borrowing countries but the foreign banks and financial institutions who lend to these countries which failed to repay the loans. When due to declining exchange rates, they started withdrawing their funds, there was a crisis in the borrowing countries. A Michael Musa, the IMF Chief Economist, admitted in August 2000 that the recent financial crisis was due to high openness to international capital flows, especially short-run credit flows of countries with fragile financial systems. According to Schwartz, since the Fund lacks in high powered base money, it failed to act as an international lender of last resort. Thus the IMF has been weak in controlling financial crisis. Schwartz, therefore, suggests that it should be shut down. According to Friedman, it should be abolished as it did more harm than good.

#### CONCLUSION

Despite these criticisms, the IMF has shown sufficient flexibility to mould itself in keeping with the changing international economic conditions. The original Articles of Agreement were amended in 1978 to legalise flexible exchange rates, raise quotas to increase the Fund's resources and to dethrone the gold in Fund transactions. To solve the problem of international liquidity, it has created deficits, the Fund has been successively raising the limit of their borrowings which stands at 450 per cent of their quotas. The Fund has been helping the developing countries in their balance of payments and other problems through such facilities as CFF, BSFF, EFF, SFF, SAF, ESAF, CCFF, etc. Finally, the usefulness and success of the Fund lies in that its membership has risen from 44 in 1947 to 182.

### GGESTIONS TO REFORM THE IMF

Prof. Samuelson in his article Three Cheers for the IMF published in 1997 praised the working and chievements of the IMF. According to him, the reason for the Mexican financial crisis was that did not follow IMF's warning when hot money was flowing in it. The same reason was responble for the Asian crisis. On the other hand, Prof. Friedman in his article in October 1998 blamed e IMF for the global crisis and pleaded for abolishing it as it did more harm than good. Prof ingly, the Fund held 45 anctions from tune 1976 to May 1980 assuming to 47 million messes at gold prices prevailing in the Lindon Market. The Fund's present gold holdings except to 1.59 tions except that the Fund continues to value its holdings at 5176.5 35 on outer. According to reserve asset.

### 9. SPECIAL DRAWING RIGHTS (SDRs)

#### MEANING

Special Drawing Rights (SDRs), also known as the paper gold, are a form of international esserves created by the IMF in 1969 to solve the problem of international liquidity. They are not paper notes or currency. They are international units of account in which the official accounts of the IMF members in proportion to their Fund quotas and are used to settle balance of payments deficits between them.

### ORIGIN OF SDRS

SDRs were created through the First Amendment to the Fund Articles of Agreement in 1969 following persistent US deficits in balance of payments to solve the problem of international following problem of international liquidity. Until December 1971, an SDR was linked to 0.88867 gram of gold and was equivalent to US\$1. With the breakdown of the fixed parity system after 1973 when the US dollar and other major currencies were allowed to float, it was decided to stabilise the exchange value of the SER. Accordingly, the value of the SDR was calculated each day on the basis of a basket of 16 most widely used currencies of the member countries of the Fund. Each country was given a weight in the basket in accordance with its importance in international trade and financial markets. After the Second Amendment to the Fund Articles of Agreement in 1978, the SDR became an international unit of account. To facilitate its valuation, the number of currencies in the "basket" were reduced to five in January 1981. They include the US dollars, the German Deutsche Mark, the British Pound, the French Franc and the Japanese Yen. The present currency composition and weighting pattern of the SDR is revised every five years beginning January 1, 1986. The revision of weights is based on both the values of the exports of goods and services and the balances of their currencies held by other members. In 1977, they were US dollar (39%), Cerman pM (21%), UK pound and French franc (11% each) and Japanese yen (18%). The value of one SDR was equal to US \$ 1.35610 on October 1, 1997.

### USES OF SDRS

SDR is an international unit of account which is held in the Fund's Special Drawing Account. The quotas of all currencies in the Fund General Account are also valued in terms of the SDR. As the international monetary asset, the SDR is held in the international reserves of central bank and governments to finance their deficits or surpluses of balance of payments. All transaction by the Fund in the form of loans and their repayments, its liquid reserves, its capital, etc., a expressed in the SDR.

DRs are used as a means of payment by Fund members to meet balance of payments deficed their total reserve position with the Fund. They cannot be used for any other purpose. The DRs act both as an international unit of account and a means of payment.

Here are three principal uses of SDRs.

THE WORLD TRADE ORGANISATION (WTO) : 867 It provides the framework for the implementation, administration and operation of the Plurilateral Trade Agreements relating to trade in civil aircraft, government procurement, trade in dairy products and bovine meat.

It provides the forum for negotiations among its members concerning their multilateral trade relations in matters relating to the agreements and framework for the implemenation of the results of such negotiations, as decided by the Ministerial Conference.

It administers the Understanding on Rules and Procedures governing the Settlement of Disputes of the Agreement.

It co-operates with the IMF and the World Bank and its affiliated agencies with a view to achieving greater coherence in global economic policy-making.

WTO AGREEMENT The Agreement establishing the WTO consists of the following which embody the results of the Uruguay Round of the Multilateral Trade Negotiations:

- Multilateral Agreements on Trade in Goods: GATT Rules 1994.
- General Agreements on Trade in Services.
- Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPs).
- Understanding on Rules and Procedures governing the Settlement of Disputes
- Plurilateral Trade Agreements.
- Trade Policy Review Mechanism.

They are discussed as under:

1. MULTILATERAL AGREEMENTS ON TRADE IN GOODS. The general agreement on trade in goods defines the GATT 1994 and includes various agreements dealing with different aspects related to trade in goods.

CATT 1994 includes GATT 1947 as amended up to January 1, 1995 when the WTO Agreement (1) GATT 1994 to also includes the provisions of specified legal instruments, the Marrakesh to all sights and obligations, the

been encouraging over production at high cost to them. The export subsidies are used been encouraging over productions which artificially lower the prices of such commods

ner, the opening up of markets since the WTO Agreement has been in the developing counts there has been little success in getting market access in developed countries. For instance hare of agricultural exports from developing countries to Western Europe declined to in 1990 to 28% in 1998. Market access to developing countries continues to be restricted

nay first study, "Gains from the Uruguay Round" in the previous chapter. ing Agreements are discussed in detail in the previous section.

### THE WORLD TRADE ORGANISATION (WTO)

### 1. INTRODUCTION

The Uruguay Round of GATT negotiations concluded on April 15, 1994 at Marrakesh, Morocon India, along with 123 Ministers besides the EC countries signed the Final Act incorporating the Eighth round of multilateral trade negotiations. The Final Act consists of: (1) the WTO Agreement which covers the formation of the organisation and the rules governing its working; and (2) the Ministerial decisions and declarations which contain the important agreements covering trade in goods, services, intellectual property and plurilateral trade. They also contain the dispute settlement rules and trade policy review system. The WTO Agreement is in fact the Uruguay Round agreements whereby the original GATT is now a part of the WTO Agreement which came into force from January 1, 1995.

### 2. THE WTO

The WTO is the successor to the GATT. The GATT was a forum where the member countries me from time to time to discuss and solve world trade problems. But the WTO is a properly established permanent world trade organisation. It has a legal status and enjoys privileges and immunities on the same footing as the IMF and the World Bank. It includes: (1) the GATT, as modified by the Uruguay Round; (2) all agreements and arrangements concluded under the GATT; and (3) the complete results of the Uruguay Round.

There were 77 member countries of the WTO on January 1, 1995. Now there are 151 members and is one of the founder members.

### DIFFERENCE BETWEEN GATT AND WTO

The WTO is not an extension of the GATT but successor to the GATT. It completely replace GATT and has a very different character. The major differences between the two are the following

The GATT had no legal status whereas the WTO has a legal status. It has been create
by international treaty ratified by the governments and legislatures of member states.

- has a global status similar to that of the IMF and the World Bank. But unlike them, it is not an agency of the UN, although it has a 'cooperative relationship' with the UN.
- The GATT was a set of rules and procedures relating to multilateral agreements of a selective nature. There were separate agreements on separate issues which were not binding on members. Any member could stay out of an agreement. Only those who signed the agreement could be penalised on default. The agreements which form part of the WTO are permanent and binding on all members. Action can be taken against
- The GATT dispute settlement system was dilatory and not binding on the parties to the dispute. The WTO dispute settlement mechanism is automatic, faster and binding on the parties. The Dispute Settlement mechanism is an its first decision brought the mighty US to accept its verdict. Thus the WTO has teeth whereas the GATT was toothless.
- The GATT was a forum where the member countries met once in a decade to discuss and solve world trade problem. and solve world trade problems. There used to be long, protracted negotiating rounds which took decades to consolid. which took decades to complete. The WTO, on the other hand, is a properly established rule-based world trade over the WTO, on the other hand, is a properly established. rule-based world trade organisation where decisions on agreements are time bound.
- The GATT rules applied to trade in goods. Trade in services was included in Uruguay Round but no agreement was and Round but no agreement was arrived at. The WTO covers not only trade in goods and services but also trade related services but also trade-related aspects of intellectual property rights and a number of other agreements
- The GATT had a small secretariat managed by a Director General. But the WTO has a large secretariat and a huge organisational set-up.

3/7 The structure or organisation of the WTO is headed by the Ministerial Conference composed of TS STRUCTURE representatives of all the members which meet at least once every two years. It carries out the functions of the WTO and takes actions necessary to this effect. It takes decisions on all matters under any of the Multilateral Trade Agreements. The Ministerial Conference is the supreme

There is the General Council composed of representatives of all the members to oversee the operation of the WTO Agreement and ministerial decisions on a regular basis. It also acts as a Dispute Settlement Body (DSB) and a Trade Policy Review Body (TPRB), each having its own

Chairman. The General Council sits in Geneva on an average of once a month. There is the Council for Trade in Goods, the Council for Trade in Services and the Council for Trade-Related Aspects of Intellectual Property Rights (TRIPs) which operate under the General Council. These Councils, in turn, have their subsidiary bodies. The Councils and subsidiary

There is the Committee on Trade and Development, the Committee on Balance of Payments Restrictions and the Committee on Budget, Finance and Administration which carry out the functions assigned to them by the WTO Agreement, the Multilateral Trade Agreements and any

The Secretariat of the WTO is headed by the Director General. The Ministerial Conference appoints he Director General and sets out his powers, duties, conditions of service and terms of office. The Director General is appointed for a four-year term. He has four deputies from different

The payment and repayment of SDRs out of the Special Drawing Account is easier and more flexible than under the Funds.

Last but not the least, SDRs act both as a unit of account and a means of payment of international monetage system. international monetary system.

### Criticisms of SDRs

Despite these merits, the SDR scheme has been criticised on the following grounds:

1. Inequitable Distribution. It is an inequitable scheme which has tended to make unfair distribution of international liquidity. The allocation of SDRs to participating countries is proportional to their quotas. In this sense, the allocation of SDRs to developing countries is too low as compared to their needs. Low allocation of SDRs reduces the borrowing capacity of such coun-

2. Not Linked with Development Finance. SDR scheme does not link the creation of international reserves in the form of SDRs with the need for development finance on the part of developing countries. The need for liquidity on the part of developing countries is great "because of their higher costs of adjustment, limited access to private banking and higher capital markets, greater variability of exchange earnings, and opportunity cost of holding foreign exchange reserves". Under these circumstances, there is need to create more SDRs with fair distribution so that more unconditional liquidity is made available for the greater needs of developing coun-

3. High Interest Rate. The interest rate originally payable on net use of SDRs is 1.5 per cent. This has been gradually raised through time in order to make a more acceptable asset to hold. Now both users of SDRs pay and holders of SDRs receive, a market rate of interest based on interest rates prevailing in US, Britain, France, Germany and Japan which are quite high for developing

countries.

4. Failure to Distribute Social Saving. Williamson and others have criticised the SDR scheme for its failure to distribute social saving of SDRs to the developing countries. The present rules for allocation distribute the social saving to a participant country in proportion to his contribution or its demand for SDRs. If the supply of SDRs equals the demand for it, there will no redistribution of resources between countries. But this is not so in the case of developing countries whose holdings of SDRs are very low as compared to the 26 developed countries. Thus the

present scheme of SDRs fails to transfer social savings to the developing countries.

5. Failure to meet International Liquidity Requirements. Unfortunately, due to the rigid attitude of the United States and some other developed countries, the Fund has not been able to resume allocation of SDRs from January 1982, despite the repeated pleas of the developing countries over these years. So the Fund has failed in its objective of increasing international liquidity through SDRs. Consequently, faced with a recession, an inadequate flow of concessional aid and falling prices of commodities and raw materials, developing countries have been facing severe balance of payments and debt problems. Thus SDRs have failed to solve the problem of interna tional liquidity.

They are a great outdered with the debt service reason that developing countries like India are so heavily burdened with the debt service

that fresh borrowings are negative.

3. Secondary Role. The Fund has been playing only a secondary role rather than the only a secondary Role. The Fund has been playing only a secondary role rather than the only the secondary Role. 3. Secondary Role. The rund has been playing only in international monetary relations. It does not provide facilities for short-term credit; ments. This has resulted in "swap" arrangements among the central banks of the Groundersteins. Under these arrangements, these countries and of the leading developed countries. Under these arrangements, these countries exchanged the short term credit to tide over temporary. of the leading developed commes. On the leading developed commes other's currencies and also provide short-term credit to tide over temporary disequiped to the growth of their balance of payments. Such swap arrangements have led to the growth of Euro-Market. All this has reduced the importance of the Fund.

4. Lack of Resources. The IMF has not enough resources for immediate future. But these sufficient to meet the future needs of its members. The need is to raise the resources of to safeguard the international financial system which is dominated by volatile capital fle

developed countries are not willing to increase the quota of the Fund.

5. Failure to Maintain Exchange Rate Stability. The Fund has failed in its objective of ing exchange stability and to maintain orderly exchange arrangements among member the original Fund agreements, the exchange rate was permitted to fluctuate within a ra per cent above to 1 per cent below the official price. This was known as the "adjustal system. The exchange rate of every member country was fixed in terms of the "golden Over the years US gold stock continued to decline, the US balance of payments conti deteriorate. Consequently, the Bretton Woods system collapsed on 15 August, 1971 who dent Nixon announced that United States would no longer convert dollars into gold an would not intervene in foreign exchange markets to maintain exchange rate stability. So there has been a mixture of exchange rate systems of nationally managed floating, joint and pegged exchange rates. According to Prof. Schwartz, the IMF has lost its objective 6. Failure to Eliminate Foreign Exchange Restrictions. One of the objectives of the F been to eliminate foreign exchange restrictions which hamper the growth in world tra rund has not been successful in achieving this objective. The world trade is restricted

# 3. FUNCTIONS OF THE FUND

To fulfil the above objectives, the IMF performs the following functions:

The IMF operates in such a way as to fulfil its objectives as laid down in the Bretton Woods Articles of Agreements. It is the Fund's duty to see that these provisions are observed by member countries. Some of the provisions of the original Articles such as relating to exchange rates have become obsolete due to international monetary events. Accordingly the Fund has amended its Articles of Agreement to make appropriate ad-

The Fund gives short-term loans to its members so that they may correct their tempo-

The Fund is regarded "as the guardian of good conduct" in the sphere of balance of payments. It aims at reducing tariffs and other trade restrictions by the member countries. Articles VII of the Charter provides that no member shall, without the approval of the Fund, impose restrictions on the making of payments or engage in discriminatory currency arrangements or multiple currency practices. It is the functions of the Fund to have a surveillance of the policies being adopted by the member countries.

The Fund also renders technical advice to its members on monetary and fiscal policies. It conducts research studies and publishes them in IMF staff papers, Finance and De-

It provides technical experts to member countries having BOP difficulties and other

It also conducts short training courses on fiscal, monetary and balance of payments for personnel from member nations through its Central Banking Service Development, the Fiscal Affairs Department, the Bureau of Statistics and the IMF Institute.

Thus the Fund performs financial, supervisory and controlling functions.

# GRANISATION AND STRUCTURE OF THE FUND

The Second Amendment of the Articles of Agreement made important changes in the organisation and structure of the Fund. As such, the structure of the Fund consists of a Board of Governors, an Executive Board, a Managing Director, a Council and a staff with its headquarters in Washington, U.S.A. There are ad hoc and standing committees appointed by the Board of Governors and the Executive Board. There is also an Interim Committee (now the International Monetary and Financial Committee—IMFC) appointed by the Board of Governors. The Board of

Two, ment of the part of 10. Big increase and they may diversify. In this way, all member States was be capable of her increasing intra-regional set up joint ventures in each other's country, especially layer of intra-regional trade and trade with the rest Il SAARC members should be up joint ventures in each other's country, specially large and intra-regional trade and trade with the rest of the world may reason of the world may reason. developed could regional trade and trade with the rest of the world may expend to SAPTA primarily depends on the country of the state of the world may expend to SAPTA primarily depends on the country of the state of the world may expend to the state of the state of the state of the world may expend to the state of the increase and intra-region of the march from SAPTA to SAPTA primarily depends upon the world may expend upon the basis of reciprocal trade conventions. 12. For SAARC to him.

This is possible on the basis of reciprocal trade concessors, and Packets

India and Pakistan. This is possible on the basis of reciprocal trade concessors, and Packets

India and giving up hostile attitude towards led. India and Pakistatus to India and giving up hostile attitude towards India. LAPPRAISAL OF SAARC SAARC is one of the smallest trade organistations of the world whose primary sim is to acceler

saak the social and economic development of member States) It is the poorest trade organization whose four members viz. Bangladesh, Nepal, Bhutan and Maldives come in the category of least whose four the category of least developed countries. The total annual trade of SAARC countries in the global trade in 1997 was \$ 109.7 billions. India took the major share in total global trade accounting for \$2.1% and the balance of about 38% was shared by the other six member countries—Pakistan (18.4%), Rengiadesh (9.4%), Sri Lanka (8.2%), Nepal (1.5%), Maldives (0.25%) and Bhutan (0.15%), The intra-SAARC trade was \$ 3,000 millions which was less than 3% of the region's total good trade When SAARC becomes a free trade zone by 2005, its share in the global trade is likely to achieve the target of 10%. So far as India is concerned, its cumulative trade with other SAARC member countries was Rs. 7,500 crores in 1999-2000. Of this, exports were at Rs. 6,100 crores and imports at Rs. 1,400 crores.

### ACHIEVEMENTS OF SAARC

ng

As a result, bilateral trade balances have been adversely affected between the has increased. 11. With the result, bilateral trade balances which would make SAFTA a member states. This has led to the demand for tariff barriers which would make SAFTA a mote possibility.

12. The long-drawn hostility between Pakistan and India has overturned the schedule of establishment. lishing the SAFIA by 2002 and the SAARC Community by 2005.

## $\overline{10.}$ Suggestions to Increase Economic Co-operation and $T_{RA}$ IN SAARC

The following suggestions are made to increase trade and economic cooperation among SA countries:

1. Tariff and non-tariff barriers should be removed by granting more concessions, espe

average import tariffs imposed by India, Pakistan, Bangladesh and Sri Lanka.

2. Trade among SAARC countries can be increased through transport facilities. For this road and water transport infrastructure should be strengthened. Besides, there is the n improve the procedures for the grant of visas, transportation of goods and clearance at points.

3. Norms regarding the origin of products under SAPTA should be relaxed. At present proportion of the manufactured or produced product or the imported input of a SAARC exceeds 50%, the product will not be considered to be the produce of that country and it get trade concessions. But to increase trade among SAARC countries., it is essential ultimate place of manufacture of a product should be the sole criterion for determining gin of a product.

4. SAARC countries mostly re-export primary products. In the coming years, they should lish manufacturing industries. For this, they should set up special export areas. To at eign investments, they should enter into buy-back agreements and also provide fiscal a acilities to foreign investers.

There should be periodic meetings among exporters, importers and private sector re res of SAARC countries so that informations may be provided for tradeable products

5 Systematic Transformation Facility (STF). In April, 1993, the DAF established STF with \$6 systematic pillion to help Structural Adjustment Loans (ESAL). The Fund eastblished ISAL facility in early s garergency a gar 1999 to help 1999 to countries are given short-term loans 3% to 5% above the Fund's normal interest rate which 1990 to help 1999 to help 1999 to help 1990 to countries are given short-term loans 3% to 5% above the Fund's normal interest rate which are to be repaid in a short period

are to be repaired to g. Contings

g. Co sound countries, rather than from domestic policy weaknesses. Only countries that over the medium term can finance BOP from donness of the state of th ered for CCL. So far no country has drawn from it. 4. EXCHANGE RATES

The original Fund Agreement provided that the par value of each member country was to be The original terms of gold of certain weight and fineness or US dollars. The underlying idea was expressed a system of stable exchange rates with orderly cross rates. But the Fund was obliged to agree to change of ± 1 per cent required the agree to the large of ± 1 per cent required the permission of the Fund. Since 1971, these provisions have been changed and the international monetary system has moved from fixed exhrange rates. Under the to flexible exchange rates. Under the new system, the member countries are not expected to naintain and establish par values with gold or dollar. The Fund has no control over the exchange rate adjustment policies of the member countries.

But under Article IV of the Second Amendment, effective April 1978, the Fund has laid down principles for the guidance of exchange rate policies of its members : (a) to avoid manipulation of exchange rates in order to gain an unfair competitive advantage over other members; (b) to intervene in the exchange market to counter disorderly conditions; and (c) to take into account in their intervention policies the interests of other members.

### 5. OTHER FACILITIES

The IMF advises its member countries on various problems concerning their BOP and exchange The IMF advises its member countries on various problems concerning their BOP and exchange rate problems and on monetary and fiscal issues. It sends specialists and experts to help solve gest monetary, fiscal and other measures in their reports. They confer with local officials and sugto solve banking and fiscal problems of member countries. The Fund has set up three departments Service Department which helps member countries. First, there is the Central Banking services are especially and their central banks and to formulate banking legislation. Such services are especially manage their central banks and to formulate banking legislation. Such services are especially provided to developing countries to reform their banking system. Second, the Fiscal Affairs Department renders advice to member countries concerning their fiscal matters. Third, The IMF Institute conducts short-term training courses for the officers of member countries relating to monetary, fiscal, banking, and BOP policies. Besides, the Fund's research department publishes many reports in a year containing material relating to different policy measures. These publicaions include IMF Annual Report and IMF Staff Papers, Finance and Development Journal, etc.

he IMF has been severely criticised in recent years for mishandling global finanacial crises in ast Asia and Latin America, aggravating poverty in developing countries, encouraging bad olicies by governments and financial investors and favouring the developed countries. We TRNATIONAL ECONOMICS

# TRADE AND ECONOMIC CO-OPERATION

SAARC has taken various steps to expand trade and economic cooperation among member SAARC Preferential Trading Arrangement (SAPTA) is more important.

## SAARC PREFERENTIAL TRADING ARRANGEMENT (SAPTA)

The SAPTA Agreement for trade and economic cooperation among member countries came into force on 7 December 1995.

### MAIN FEATURES OF SAPTA

The following are the main features of SAPTA:

1. Objectives. SAPTA is a contractual agreement which presents a pattern of rules for gradual liberalisation of intra-regional trade among SAARC member countries. The main objective of SAPTA is to promote and sustain mutual trade and economic co-operation among SAARC State through the exchange of concessions on para-tariff and non-tariff measures.

2. Principles. Article 3 of the agreement explains the following basic principles which admini

ter the agreement.

(a) All member States will receive benefits equitably on the basis of reciprocity and mutuality advantages. However, their respective levels of economic and industrial development, the tern of their external trade, trade and tariff policies and systems will be taken into account.

(b) SAPTA agreement shall be negotiated step by step, improved and extended graduall

successive stages. It will be reviewed periodically.

(c) SAPTA agreement emphasizes on the special needs and preferential treatment for the

developed member countries. 3. Scope. All products, manufactures and raw materials, semi-processed and processed shaped included the semi-processed shaped shaped included the semi-processed shaped included the semi-processed shaped shaped shaped included the semi-processed shaped s included in the mutual concessions given by member countries. Under this, trade liberal shall be done by proforential arrangements relating to tariffs, para-tariff, non-tariff and ments:

(ii) By setting up manufacturing and other facilities in least developed member countries meet their intra-regional demand under cooperative arrangements;

(iii) By formulation of export promotion policies, establishment of training facilities in the facilities are greater than the facilities of trade and supporting export marketing of products through such measures as export one insurance, access to market information, etc.;

(iii) By removing non-tariff and para-tariff barriers and providing duty free access, exclusionally preferences or deeper tariff preferences for export products;

(iv) By negotiating long-term contracts to achieve reasonable levels of sustainable exports;

(iv) By giving special consideration of exports in the application of safeguard measures face and the product of the pro

mporting member country may suspend that concession provisionally. Second, SAPTA Agreement lays down provisions for information, consultation and dispute settlement in order to adopt alance of trade and safeguard measures by any member country.

Extention of Negotiated Concessions. The concessions agreed to under SAPTA, except the made exclusively to the LDCs, shall be extended unconditionally to all member States.

Committee of Participants. SAPTA has a Committee of Participants consisting of representations.

ves of member States. The Committee meets at least once a year to review the progress made implementation of this Agreement. It ensures that benefits of trade expansion arising in a Agreement accrue to all member States equitably.

Non-Application of the Agreement. The provisions of this Agreement shall not apply to me

er States under the following situations:

preferences have already been granted or are to be granted by one State to some other mem

ates, and to third countries through bilateral, plurilateral and multilateral trade agreements and similar arrangements.

Modification and Withdrawal of Concessions. Any member State which has given continuously (CEC) of its intention to modification.

ons may notify the Committee on Economic Co-operation (CEC) of its intention to modificate the concessions after a period of three years. For this, that country will entern insultations and negotiations with another concerned country and if necessary, negotiate propriate compensation. If an agreement is reached within six months, the CEC may ask

propriate compensation. If an agreement is reached within six months, the edeected member State to withdraw or modify equivalent concessions. But if any country le PTA, other member States shall be free to withdraw all the concessions given to it. Withdrawal from SAPTA. Any member State may withdraw from SAPTA. For this,

gional Cooperation (SAARC).

### . OBJECTIVES

The following are the objectives of SAARC:

1. To promote the welfare of the people of South Asia and to improve their quality of 2. To accelerate economic growth, social progress and cultural development in the re-

provide all individuals the opportunity to live in dignity and to realise their full po

3. To promote and strengthen collective self-reliance among the member countries.

4. To contribute to mutual trust, understanding and appreciation of one another's 5. To promote active collaboration and mutual assistance in the economic, social, or

nical and scientific fields.

6. To strengthen cooperation with other developing countries.

7. To strengthen cooperation among themselves in international forums on matter interest.

8. To cooperate with international and regional organisations with similar aims a

cates. This prerequisite has not been taken as a few decided of the cant number of preferential opportunities remain untapped for essentially administration sons.

Lastly, the scope for the extension of GSP is quite limited as product-producers in LDCs strong competitive position in the world markets.

3. Development Finance

Right from the UNCTAD III LDCs have been voicing their concern over the growing profession of their balance of payments deficits and indebtedness. The UNCTAD III held at Santig 1972 passed a resolution asking the IMF to work out a scheme for the link-up of Special Rights (SDRs) with development finance. This was essential because the SDRs had be with individual members' quotas in the IMF. Since the quotas of LDCs were small, they are small share of SDRs. By another resolution, the UNCTAD III asked the Development share of SDRs. By another resolution, the UNCTAD III asked the Development share of SDRs. By another resolution, the UNCTAD III asked the Development share of SDRs. By another resolution, the UNCTAD III asked the Development share of SDRs.

with individual members' quotas in the IMP. Since the quotas of LDCs were small, they a very small share of SDRs. By another resolution, the UNCTAD III asked the IMP to Committee for Monetary Reform which should have as many members from LDC were from the developed countries. The UNCTAD III was also called upon to provide examination of the relationship between indebtedness and development and to repropriate remedial measures. Moreover, the LDCs proposed at UNCTAD III that cent target of development assistance agreed upon by the developed countries as international development strategy should not include components distinct from assists private investment, and credits by suppliers and purchasers, and that it should everse flows of interest payments. But UNCTAD III failed to achieve anything ssues. The UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at Nairobi in May 1976 also failed to solve the debt and the UNCTAD IV held at

over the years, the various UNCTAD meetings have failed to solve the problems of debt and Over the years, development aid of LDCs. At best, they have been forums for exchanging ideas and passing, development than getting the issues solved. As observed the problems of debt and development than getting the issues solved. As observed by The Economist, London, UNCTAD resolutions rather than getting the issues solved on development the initiative on debt to the IMF and on development. resolutions lated to the IMF and on development to the World Bank. The debt issue has lost the transfer over by the IMF because it acts as a bank itself and has the confidence of western has been taken overnments. Unlike UNCTAD, the World and has the confidence of western has been the connected of western bankers and governments. Unlike UNCTAD, the World Bank has both money and effective advice to dispense to promote development.

# 4. TECHNOLOGY TRANSFER

It was at the UNCTAD at Nairobi in 1976 that the meeting pressed for measures which would strengthen the technology capability of LDCs. It was pointed out that better research facilities, training programmes and establishment of local and regional centres for technology transfer would serve the purpose. The Conference also set up a group of experts to draft a code of conduct of technology transfer. Besides it urged the revision of international patent system.

The UNCTAD VI held at Belgrade in June 1983 emphasised the need for transfer of technological to LDCs in order to promote their speedy and self-reliant development. The Conference d cussed and approved a policy paper, "A Strategy for the Technological Transformation of I veloped Countries" prepared by the UNCTAD secretariat. The study noted that during the p World War II era many LDCs attained political independence but it has been severely constra by their economic and technological dependence on the developed countries. The LDC weak partners in an unequal world. Despite considerable progress in LDCs during the three decades, technological gap between them and the developed countries has widened study emphasised the need to attain technological transformation of LDCs by reducing external technological dependence and strengthening their national capacity for autono technological development. This requires reduction in its dependence on the agricultural

and on primary production in general. The spearhead of the strategy for technological tr mation has to be an accelerated tempo of industrialisation. Processing of primary produ fore marketing them will widen industrialisation through diversification. Since technology

It was at UNCTAD VII (Geneva) that a Common on a local buffer stock of ten storable commodities. and for commodities under the IPC became operational after a number of countries ratified expressed their intentions to do so. New pledges announced at UNCTAD VII raised its to edged capital to 66.9 per cent \$ 4.7 billion fund, allowing it to become operational.

### TRADE IN MANUFACTURED GOODS (GSP)

Cs have strongly urged the developed countries to give them tariff preferences on their man ctured and semi-manufactured goods. At UNCTAD I, the G-77 urged the developed country grant a Generalised System of Preferences (GSP) to the exports of such goods to the developuntries. It was at UNCTAD II (New Delhi) in 1968 that all members unanimously agreed e early establishment of a mutually acceptable system of generalised, non-reciprocal and no scriminatory preferences. The objectives specified for the GSP were: (a) to increase the expo rnings of LDCs; (b) to promote their industrialisation; and (c) to accelerate their growth rate ius the main aim of the GSP was to create a trade mechanism to enable LDCs to export without y tariff or other barriers to the developed countries and enable their products to compete of ose markets with local production and thus encourage industrialisation and investment in the

The agreement recognises that during the interim period least (iii) The developed and net food-importing developing countries may experience negative effects with respect to supplies of food imports. It, therefore, sets out objectives with regard to the provision of food aid and basic foodstuffs in full grant form and aid for agricultural development. It also refers to the possibility of short-term financing of commercial food imports by the IMF and the

A Committee on Agriculture has been established to monitor and review the implementation of the provision of the Agriculture Agreement

#### (3) AGREEMENT ON TEXTILES AND CLOTHING

The objective of this Agreement is to secure the integration of the textiles and clothing sector into the GATT 1994. The integration of this sector would take place in four phases. First, on January 1, 1995 each party was integrated into GATT products from the specific list in the Agreement which accounted for not less than 16 per cent of its total volume of imports in 1990. In the second phase beginning January 1, 1998, products which accounted for not less than 17 per cent of 1990 imports would be integrated. In the third phase beginning January 1, 2002, products which accounted for not less than 18 per cent of 1900. not less than 18 per cent of 1990 imports would be integrated. All remaining products would be integrated at the end of the transition integrated at the end of the transition period on January 1, 2005 in the fourth phase. Integration means that trade in tops and yarns, fabrics, made-up textiles products, and clothing will be governed by the General Rules of GATT. All MFA (Multi-Fibre Agreement) restrictions existing on December 31, 1994 have been carried over into the new Agreement and would be maintained until such time as the restrict. until such time as the restrictions are removed or the products integrated into the GATT. In the case of non-MFA restrictions maintained by some members, they would also be brought within the purview of the GATT 1994 within one year of the coming of the Agreement into force or

There is a specific transitional safeguard mechanism for products not yet integrated into the GATT 1994 at any phase. Action can be taken against an individual exporting country if it is found by the importing country that overall imports of a product were entering the country in such large quantities as to cause serious damage to the relevant domestic industry. Action under the safeguard mechanism can be taken either by mutual agreement following consultations or unilaterally but subject to the review of the Textile Monitoring Body. Safeguard restraints can be in operation for up to three years without extension or until the product is integrated into the CATT.
As part of the subspection process, all expendent shall take such assume a part of the subspection process, as to delive GATT Rules and secting at may be processed to fail and equitable trading condition of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions of policies relating to fair and equitable trading conditions.

#### 5. ITS OBJECTIVES

In its Preamble, the Agreement establishing the WTO lays down the following objections

- Its relations in the field of trade and economic endeavour shall be conducted as standards of living, ensuring full employment and large and Its relations in the field of trade and economic full employment and large and view to raising standards of living, ensuring full employment and large and view to raising standards and effective demand, and expanding the view to raising standards of living, ensuring growing volume of real income and effective demand, and expanding the proand trade in goods and services.
- and trade in goods and services.

  To allow for the optimal use of the world's resources in accordance with the day.

  To allow for the optimal use of the world's resources in accordance with the day. To allow for the optimal use or the works of sustainable development, seeking both (a) to protect and preserve the emission of sustainable development for doing so in a manner consistent with respect of sustainable development, seeing so in a manner consistent with respective and concerns at different levels of economic development.
- To make positive efforts designed to ensure that developing countries, especially the property of them, secure a share in the growth in internal least developed among them, secure a share in the growth in international has a state of their economic development. commensurate with the needs of their economic development.
- To achieve these objectives by entering into reciprocal and mutually advantage. arrangements directed towards substantial reduction of tariffs and other barriers arrangements directed towards substantial reduction of tariffs and other barriers are a transport in international trade sold and the elimination of discriminatory treatment in international trade telations
- To develop an integrated, more viable and durable multilateral trading specific to develop and integrated, more viable and durable multilateral trading specific to develop and all develops and all develops and all develops and all develops are developed and durable multilateral trading specific trading specific trade and durable multilateral trade and durable m encompassing the GATT, the results of past liberalisation efforts, and all the results the Uruguay Round of multilateral trade pegotiations.
- To ensure linkages between trade policies, environmental policies and sustant development

#### TS FUNCTIONS

The following are the functions of the WTO:

1. It facilitates the implementation, administration and operation of the objectives dis-Agreement and of the Multilateral Trade Agreements.

THE WORLD TRADE ORGAN It provides the framework for the implementation, administration and operation of the It provide all Trade Agreements relating to trade in civil aircraft, government procurement grade in dairy products and bovine meat trade in the forum for negotiations among its members concerning their multilateral trade relations in matters relating to the agreements and framework for the implemenation of the results of such negotiations, as decided by the Ministerial Conference Control of the Lorenzant of the Agreement of Disputes of the Agreement Dispute the Competates with the IMF and the World Bank and its affiliated agencies with a view to achieving greater coherence in global economic policy-making WTO AGREEMENT The Agreement establishing the WTO consists of the following which embody the results of the The Agreement of the Multilateral Trade Negotiations: Multilateral Agreements on Trade in Goods : GATT Rules 1994. General Agreements on Trade in Services. Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPs) Understanding on Rules and Procedures governing the Settlement of Disputes 1. Plurilateral Trade Agreements. 40 Trade Policy Review Mechanism They are discussed as under: 1. MULTILATERAL AGREEMENTS ON TRADE IN GOODS The general agreement on trade in goods defines the GATT 1994 and includes various agreements dealing with different aspects related to trade in goods. The GATT 1994 includes GATT 1947 as amended up to January 1, 1995 when the WTO Agreement The GATT 1994 includes Only 1992 as amended up to January 1, 1995 when the WTO Agreement came into force. It also includes the provisions of specified legal instruments, the Marrakesh and the CATT 1994 and the following updates the case of the CATT 1994 and the following updates the case of the CATT 1994 and the following updates the case of the CATT 1994 and the following updates the case of the ca (1) GATT 1994 Protocol to GATT 1994 and the following understandings.

(a) Article II: 1(b) of GATT 1994. To ensure transparency of the legal rights and obligations, the Protocol to GATT 1994 and the following understandings nature and level of any "other duties or charges" levied on bound tariff items in the Schedules of (b) Article XVII of GATT. To ensure transparency of the activities of state trading enterprises. members are required to notify such enterprises to the Council for Trade in Goods for review by concessions continue with effect from April 15, 1995. the working party attends once a year and report to the Council.

(c) Understanding on Balance of Payment Provisions of GATT. Members imposing restrictions for the Understanding on Balance of Payment Provisions of GATT. Members imposing restrictions for the Understanding on Balance of Payment Provisions of GATT. the working party atleast once a year and report to the Council. purposes of balance should do so in the least disruptive manner. They should give preference to purposes of balance should do so in the least disruptive mariner. They should give presente the price price-based measures like import surcharges, import deposits or measures which affect the price. of imported goods. They should avoid the imposition of "new" quantitative restrictions and should publicly announce "as soon as possible" time schedules for the removal of restrictive import measures for purposes of balance of payments. The Committee on Balance of Payments Restrictions carries out consultations in order to review all restrictive import measures taken has a global status similar to that of the IMF and the World Bank. But unlike them, was not an agency of the UN, although it has a 'cooperative relationship' with the 17% The GATT was a set of rules and procedures relating to multilateral agreements of a plective nature. There were separate agreements on separate issues which were not binding on members. Any member could stay out of an agreement. Only those who signed the agreement could be penalised on default. The agreements which form part of the WTO are permanent and binding on all members. Action can be taken against any defaulting member by all the member states.

The GATT dispute settlement system was dilatory and not binding on the parties to the dispute. The WTO dispute settlement mechanism is automatic, faster and binding on the parties. The Dispute Settlement Board of the WTO in its first decision brought the mighty US to accept its verdict. Thus the WTO has teeth whereas the GATT was toothless.

The GATT was a forum where the member countries met once in a decade to discuss and solve world trade problems. There used to be long, protracted negotiating rounds which took decades to complete. The WTO, on the other hand, is a properly established rule-based world trade organisation where decisions on agreements are time bound. The dateline can be extended only by consensus.

The GATT rules applied to trade in goods. Trade in services was included in Uruguay Round but no agreement was arrived at. The WTO covers not only trade in goods and services but also trade-related aspects of intellectual property rights and a number of

other agreements.

The GATT had a small secretariat managed by a Director General. But the WTO has a large secretariat and a huge organisational set-up.

### I ITS STRUCTURE

The structure or organisation of the WTO is headed by the Ministerial Conference composed of representatives of all the members which meet at least once every two years. It carries out the functions of the WTO and takes actions necessary to this effect. It takes decisions on all matters under any of the Multilateral Trade Agreements. The Ministerial Conference is the supreme authority of the WTO.

There is the General Council composed of representatives of all the members to oversee the operation of the WTO Agreement and ministerial decisions on a regular basis. It also acts as a Dispute Settlement Body (DSB) and a Trade Policy Review Body (TPRB), each having its own

Chairman. The General Council sits in Geneva on an average of once a month.

There is the Council for Trade in Goods, the Council for Trade in Services and the Council for Trade-Related Aspects of Intellectual Property Rights (TRIPs) which operate under the General Council. These Councils, in turn, have their subsidiary bodies. The Councils and subsidiary bodies meet as necessary to carry out their respective functions.

There is the Committee on Trade and Development, the Committee on Balance of Payments Restrictions and the Committee on Budget, Finance and Administration which carry out the functions assigned to them by the WTO Agreement, the Multilateral Trade Agreements and any

additional function assigned to them by the General Council.

The Secretariat of the WTO is headed by the Director General. The Ministerial Conference appoints the Director General and sets out his powers, duties, conditions of service and terms of office. The Director General is appointed for a four-year term. He has four deputies from different member states.

The Director General appoints the members of staff of the Secretariat and determines their dutie

THE INTERNATIONAL MARKET RAY IS NOT THE OWN.

### ECIAL DRAWING RIGHTS (SDRS)

#### MERANINE

Sected Directing Rights (SDRs), since known as the paper gold, are a form of commenced sources, consteld by the DAF in 1966 to solve the problem of international liquidity. They are not paper gold or conversy. They are international units of account in which the official accounts of the pair are kept. They are allocated to the DAF members in proportion to their fund quotas and are used to write balance of payments detects between them.

#### ONCEN OF SDRS

500 were created through the First Assendment to the Fund Articles of Agreement in 1999 actioning persistent US deficits in balance of payments to solve the problem of seamnations. Squiday Until December 1971, an SDR was linked to 5 88667 gram of gold and was equivalent to US \$1. With the breakdown of the fixed parity system after 1973 when the US dollar and other paid currencies were allowed to float, it was decided to stabilise the exchange value of the SUR. Accordingly, the value of the SDR was calculated each day on the basis of a bushet of the most a sirrly used currencies of the member countries of the Fund. Each country was given a weight in the basket in accordance with its importance in international trade and financial markets. After the Second Amendment to the Fund Articles of Agreement in 1978, the SER became an international unit of account. To facilitate its valuation, the number of currences in the "sanket" were reduced to five in January 1981. They include the US dollars, the German Deutsche Mark. the Stritish Pound, the French Franc and the Japanese Yen. The present currency emergention and weighting pattern of the SDR is revised every five years beginning January 1, 1996. The revision of weights is based on both the values of the exports of goods and services and the balances of their currencies held by other members, in 1977, they were US dollar (1974), German DM (21%). UK pound and French franc (31% each) and Japanese yen (18%). The value of one SDR was equal to US \$ 1.35610 on October 1, 1947.

#### USES OF SDRS

SDR is an international unit of account which is held in the Fund's Special Drawing Account. The quotas of all currencies in the Fund General Account are also valued in terms of the SDR. As the international monetary asset, the SDR is held in the international reserves of central banks and governments to finance their delicits or surpluses of balance of payments. All transactions by the Fund in the form of loans and their repayments, its liquid reserves, its capital, etc., are expressed in the SDR.

SDRs are used as a means of payment by Fund members to meet balance of payments deficits and their total reserve position with the Fund. They cannot be used for any other purpose. Thus SDRs act both as an international unit of account and a means of payment.

There are three principal uses of SDRs.

E Fund Conditionalities. The Fund has developed conditionalines of the Fund for pulling a loan from the Fund. Print E Fund Conditionalities. The formatting a loan from the Fund, prior to which a country has to fulfil for meeting disequilibrium in the had so which a country has to full for meeting disequilibrium in the balance of stress on expenditure infection for meeting disequilibrium in the balance of stress on expenditure in the balance of the form of the fund conditionality included the need to talk stress on expenditure reduction for the included the need to take to take int. In the 1970s, the Fund conditionality included the need to take int. try. its policy of non-interfering in their intermit excenditionalities, the Fund charges high in Z. High Interest Rates. Besides, these hard conditionalities, the Fund charges high in 2. High Interest Rates, besides, these as great burden on the borrowing countries on loans of different types. They are a great burden on the borrowing countries. on loans of different types. They are a great so heavily burdened with the debt son

that fresh borrowings are negative.

3. Secondary Role. The Fund has been playing only a secondary role rather than the o in International monetary relations. It does not provide facilities for short-term code ments. This has resulted in "swap" arrangements among the central banks of the Co of the leading developed countries. Under these arrangements, these countries exh other's currencies and also provide short-term credit to tide over temporary disco their balance of payments. Such swap arrangements have led to the growth of Euro-Market. All this has reduced the importance of the Fund.

4. Lack of Resources. The IMF has not enough resources for immediate future. But the sufficient to meet the future needs of its members. The need is to raise the resources of the to safeguard the international financial system which is dominated by volatile capital financial

developed countries are not willing to increase the quota of the Fund.

5. Failure to Maintain Exchange Rate Stability. The Fund has failed in its objective of poing exchange stability and to maintain orderly exchange arrangements among members to the original Fund agreements, the exchange rate was permitted to fluctuate within a range per cent above to 1 per cent below the official price. This was known as the "adjustable system. The exchange rate of every member country was fixed in terms of the "golden do Over the years US gold stock continued to decline, the US balance of payments continued deteriorate. Consequently, the Bretton Woods system collapsed on 15 August, 1971 when h dent Nixon announced that United States would no longer convert dollars into gold and the would not intervene in foreign exchange markets to maintain exchange rate stability. Since the there has been a mixture of exchange rate systems of nationally managed floating, joint float and pegged exchange rates. According to Prof. Schwartz, the IMF has lost its objective.

6. Failure to Eliminate Foreign Exchange Restrictions. One of the objectives of the Fund h been to eliminate foreign exchange restrictions which hamper the growth in world trade. It Fund has not been successful in achieving this objective. The world astricted by a var ety of exchange controls and multiple exchange practices

by Olscriminatory Politics. The Fund has been criticised for its discriminatory policies against place of the discriminatory place of the the developing countries and in favour of the developed countries. It is, therefore, characterized Rich Countries Club". Although the majority of its members are the developing countries of Asia, Africa and Latin America, yet it is dominated by the rich countries especially the United States. The latter often adopts a rigid attitude in matters concerning increasing the Fund resources and granting loans to developing countries

g Responsible for Asian Crisis. The sudden and unexpected East-Asian crisis in Phillipsess. South Korea, Thailand, Indonesia and Malaysia put a question mark on the working of the Fund priedman has put the blame on the IMF for global crisis because it has been the result of government's intervention in the market, both internationally via loans, subsidies or taxes, and externally via the IMF. With the collapse of the Bretton-Woods system in 1971 when the member countries adopted the floating exchange rate policy, the Funds role of regulating the exchange rate ended. Prior to the 1995 Mexican crisis, the objective of the Fund was to provide advice, information and loans to its members. But when it helped Mexico in a bail out package in its crisis of 1995, it acted the international lender of last resort. Under it, the Fund laid emphasis on close financial relations among banks, corporations and governments and to increase the operations of stock and bond markets so that there is greater competition between domestic and global financial institutions. This very policy led to the Asian and global financial crisis when there was successive decline in shares, bonds and currencies of these countries. The real beneficiaries of this policy were not the borrowing countries but the foreign banks and financial institution who lend to these countries which failed to repay the loans. When due to declining exchang rates, they started withdrawing their funds, there was a crisis in the borrowing countries. Michael Musa, the IMF Chief Economist, admitted in August 2000 that the recent financial cris was due to high openness to international capital flows, especially short-run credit flows countries with fragile financial systems. According to Schwartz, since the Fund lacks in hi powered base money, it failed to act as an international lender of last resort. Thus the IMF been weak in controlling financial crisis. Schwartz, therefore, suggests that it should be s down. According to Friedman, it should be abolished as it did more harm than good.

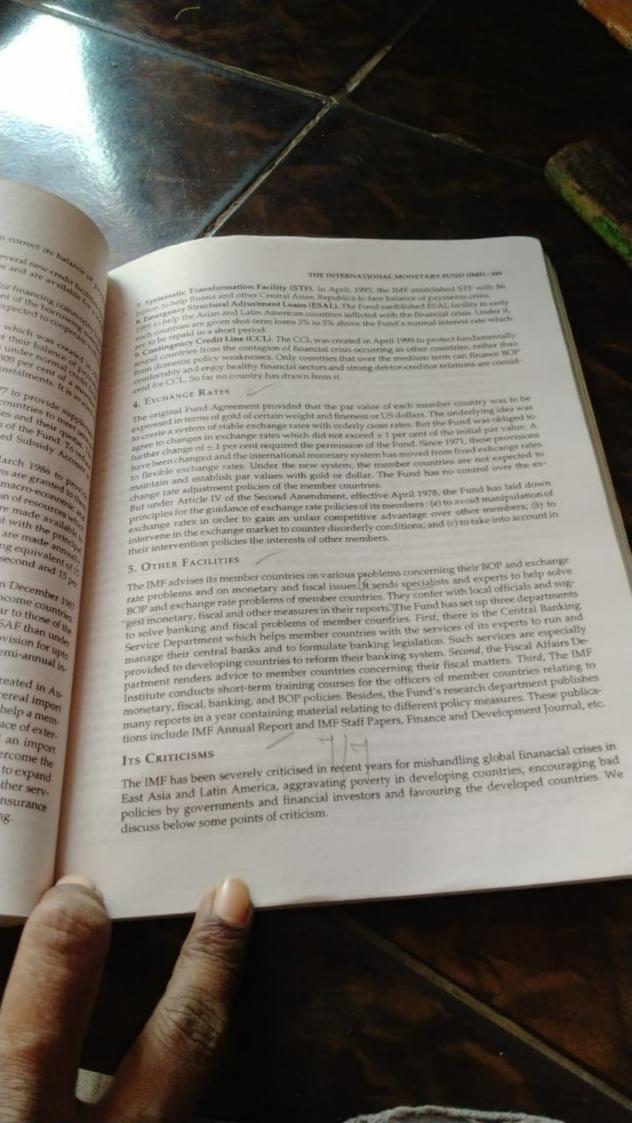

#### CONCLUSION

Despite these criticisms, the IMF has shown sufficient flexibility to mould itself in keeping the changing international economic conditions. The original Articles of Agreement were ame in 1978 to legalise flexible exchange rates, raise quotas to increase the Fund's resources a dethrone the gold in Fund transactions. To solve the problem of international liquidity, created deficits, the Fund has been successively raising the limit of their borrowings which at 450 per cent of their quotas. The Fund has been helping the developing countries i balance of payments and other problems through such facilities as CFF, BSFF, EFF, SF ESAF, CCFF, etc. Finally, the usefulness and success of the Fund lies in that its members risen from 44 in 1947 to 182.

#### 6. SUGGESTIONS TO REFORM THE IMF

Prof. Samuelson in his article Three Cheers for the IMF published in 1997 praised the wo achievements of the IMF. According to him, the reason for the Mexican financial cris it did not follow IMF's warning when hot money was flowing in it. The same reason w sible for the Asian crisis. On the other hand, Prof. Friedman in his article in October 1 the IMF for the global crisis and pleaded for abolishing it as it did more harm than

The basis of allocation of SDRs among the members of IMF is their quota subscription. about 70% of SDRs are distributed to 26 rich countries and the remaining 30% to countries.

#### MERITS OF SDRS

Despite these weaknesses, the SDRs scheme possesses the following merits:

- SDRs are a new form of international monetary reserves which have been a free the international monetary system from its exclusive dependence on the is
- They have rid the world of its dependence on the supply of gold and fluores
- They cannot be demonetised like gold or become scarce when the demand by increases in the world.
- Unlike gold, SDRs are costless to produce because production of gold requires to 4. to mine, refine, transport and guard it.
- SDRs have been created to improve international liquidity so as to correct funda-

disequilibris in balance of payments of Fund members. Under this whom, the perfect pants receive SANs under frammetions with designation and transaction by agreement an conditionally.

6 Fund members are not required to change their domestic economic point as in they are expected under the Fund aid programmes.

7. The payment and repayment of SDRs out of the Special Densing Accounts cause and more flexible than under the Fund schemes.

 Last but not the least, SDRs act both as a unit of account and a means of payment of international monetary system.

#### cisms of SDRs

Despite these ments, the SDR scheme has been criticised on the following grounds.

L. Inequitable Distribution. It is an inequitable scheme which has tended to make union distribution of international liquidity. The allocation of SDRs to participating countries is proper tional to their quotas. In this sense, the allocation of SDRs to developing countries is too low as compared to their needs. Low allocation of SDRs reduces the borrowing capacity of such countries.

2. Not Linked with Development Finance. SDR scheme does not link the creation of international reserves in the form of SDRs with the need for development finance on the part of developing countries. The need for liquidity on the part of developing countries is great "because of their higher costs of adjustment, limited access to private banking and higher capital markets, greater variability of exchange earnings, and opportunity cost of holding foreign exchange reserves". Under these circumstances, there is need to create more SDRs with fair distribution so that more unconditional liquidity is made available for the greater needs of developing countries.

3. High Interest Rate. The interest rate originally payable on net use of SDRs is 1.5 per cent. This has been gradually raised through time in order to make a more acceptable asset to hold. Now both users of SDRs pay and holders of SDRs receive, a market rate of interest based on interest rates prevailing in US, Britain, France, Germany and Japan which are quite high for developing countries.

4. Failure to Distribute Social Saving. Williamson and others have criticised the 5DR scheme for its failure to distribute social saving of SDRs to the developing countries. The present rules for allocation distribute the social saving to a participant country in proportion to his contribution or its demand for SDRs. If the supply of SDRs equals the demand for it, there will no redistribution of resources between countries. But this is not so in the case of developing countries whose holdings of SDRs are very low as compared to the 26 developed countries. Thus the present scheme of SDRs fails to transfer social savings to the developing countries.

5. Failure to meet International Liquidity Requirements. Unfortunately, due to the rigid attitude of the United States and some other developed countries, the Fund has not been able to resume allocation of SDRs from January 1982, despite the repeated pleas of the developing countries over these years. So the Fund has failed in its objective of increasing international liquidity through SDRs. Consequently, faced with a recession, an inadequate flow of concessional aid at falling prices of commodities and raw materials, developing countries have been facing sevi balance of payments and debt problems. Thus SDRs have failed to solve the problem of intertional liquidity.

The Final Act consists of a (1) the wrong Ago. Eighth round of multilateral trade negotiations, the rules governing its working and which covers the formation of the organisation and the rules governing its working and organisation and the important agreements covers which covers the formation of the organisation and the important agreements covering and decisions and declarations which contain the important agreements covering the important agreements agreement Ministerial decisions and declarations which contain the in goods, services, intellectual property and plurilateral trade. They also contain the in goods, services, intellectual property and plurilateral trade. They also contain the intellectual property and plurilateral trade. in goods, services, intellectual property and plurinateral to a settlement rules and trade policy review system. The WTO Agreement is in fact the University of the WTO Agreement rules are trade policy review system. settlement rules and trade policy review system. The Round agreements whereby the original GATT is now a part of the WTO Agreement whereby the original GATT is now a part of the WTO Agreement with the contract of the will be contracted and the contract of the will be contracted as the contr came into force from January 1, 1995

### 2. THE WTO

The WTO is the successor to the GATT. The GATT was a forum where the member countries and trade problems. But the WTO is a properly estate from time to time to discuss and solve world trade problems. But the WTO is a properly established permanent world trade organisation. It has a legal status and enjoys privileges and immune. on the same footing as the IMF and the World Bank. It includes: (1) the GATT, as modified by a Uruguay Round; (2) all agreements and arrangements concluded under the GATT; and (3) complete results of the Uruguay Round.

There were 77 member countries of the WTO on January 1, 1995. Now there are 151 members India is one of the founder members.

# DIFFERENCE BETWEEN GATT AND WTO

The WTO is not an extension of the GATT but successor to the GATT. It completely replace GATT and has a very different character. The major differences between the two are the follows

1. The GATT had no legal status whereas the WTO has a legal status. It has been create by international treaty ratified by the governments and legislatures of member states
