

POLICY ON GREEN CAMPUS

Plastic pollution has become the world's biggest hazard now. Plastic usage has become a great threat to environment. The increase in plastic usage is the result of modernist way of thinking and living. As a result one time usage plastic things have become very common. And this has led to accumulation of plastics in large scale and plastic waste management has become an unsolvable crisis of the modern world. Plastic usage is becoming a growing menace to environmental consciousness. It has proved to be a great danger to both the living and non-living organisms and to mother earth as well. Hence the college has developed a policy which helps in reducing and eliminating plastic pollution.

Measures taken:

1. The policy is followed strictly both in letter and spirit.
2. Single use plastic is totally banned. So both students and staff avoid using plastic inside the college, hostel and cafeteria premises.
3. The college organizes seminars and workshops in order to make students aware of the harmful impacts of plastic usage.
4. In the place of plastic, bags made of biodegradable materials like cloth, paper and gunny sacks are recommended for usage. Workshops are conducted to make such bags.
5. In order to avoid packed drinking water, water purifiers are kept for usage at important corners.
6. Usage of flex is minimized to a great level.
7. Students are encouraged to bring homemade food in SS tiffin boxes.
